

Solar Grid inverters – Single phase 1KW. Product range 1KW ... to 5KW rating

These inverters are easy to install, wire and operate. Suitable for both Indoor and Outdoor. They have High MPPT efficiency. Various communication options available.

Description / Features of inverters:

- Wide DC input range, 120V – 500 V DC, compatible with different module technologies.
- Transformer less design, max efficiency 97.5 %, Euro efficiency 96.6 %.
- High MPPT accuracy > 99.9 %. THD < 2%
- Easy installation, wiring, operation.
- RS485 Data communication , Optional interfaces: Wi-Fi , GPRS , Ethernet
- IP65 design, suitable for both Indoor / Outdoor installation.
- Rough dimensions : 330 * 425 * 130 (W * H * D mm)
- 5 year Warrantee.

Terms of delivery & Prices:

- Please contact us for more details along with your requirements.
- Other models available are 1.5KW, 2KW, 3KW, 4KW & 5KW.
- Second generation range of products is now available. These products offer features like better heat dissipation, longer life cycle, friendly interface – all of which contributes to better Return On Investment.
